

EZCast Beam V3 Quick Start Guide

This EZCast Beam V3 Quick Start Guide provides a guideline for basic operation. Please read the guide thoroughly before operating the projector. Visit www.EZCast.com for additional information. Product information is subject to change without prior notice. Thank you for purchasing the EZCast Beam V3 projector. Our product combines the easy to use interface, portability, and cross platform compatibility, to let you enjoy projecting media from Android, iOS phones and tablets, as well as Windows and MacOS laptops, anytime, anywhere.

EZCast app installation

Please visit www.EZCast.com/app to download EZCast app for every supported platform.

Mobile devices can proceed to the relevant download area by scanning the QR code below.

(iOS users can search for EZCast in the App Store to download the app) (Android users can search for EZCast in Google Play to download the app)

Precautions

How to use the projector

1. Do not turn the lens toward human eyes when in operation, to avoid damaging the eyes caused by the high intensity light source.

2. Do not block the device ventilation to avoid damage to the internal electronic devices due to overheating.

3. Do not use chemicals, cleaning agents or clean water to clean the device, and prevent rain water, moisture and mineral-containing liquids from corroding circuit boards.

4. Please keep the device and its parts and accessories out of reach of children.

5. Please ensure that the device is operated in a dry and ventilated environment.

6. Do not store the device in extreme hot or cold conditions. High and low temperatures may shorten the lifespan of electronic devices. The normal operating environment is between 5°C~30°C.

7. Do not put the device into any drying equipment (such as dryer, microwave oven, etc.).

8. Do not squeeze or place heavy objects over the device to avoid damage to the device.

9. Do not throw, knock or shake the device violently, which may damage the internal circuit boards.

10. Do not attempt to disassemble the device without permission. If there is any problem, please contact customer support.

11. Do not repair any product by yourself. If the device or any part does not work properly, you should consult customer support or return the device for repair.

12. It is recommanded to shut down for 30minutes after playing for more than 8 hours.

Never look directly into the projector lens when the lamp is turned on. The bright light can damage your eyes. Never let children look into the lens when it is on.

EZCast Beam V3 body and remote

How to set up EZCast Beam V3 projector

Preparation

- 1. Plug the power to the projector, and the power button will light up.
- 2. Insert the wireless adapter into the wireless kit port of the projector.

 To turn on projector, hold the power button of the projector for 3 seconds till you hear the "beep" sound and the light will turn blue.
 Adjust focus ring until the projection image is clear and focused.

Projector stand and holders

1. Normal mode: When projecting forward, adjust elevation angel by loosening the projector stand under the projector. When projecting upward, use the holders to avoid blockage of ventilation.

2. Portrait mode: Equip the projector holders at the bottom to make sure the ventilation works well.

Note: DLNA icon usually shows in the corner of the video, and looks like a tv which depends on different apps.

FAQ

Problems	Solutions
No electricity/can't power on	 Check whether the power cord is connected properly. Press the Power button for 3 seconds till you hear the "beeping" sound, and then release the button and wait for the projector to start up.
Unable to screen mirroring	 Make sure wireless adapter has been installed to wireless kit port on the projector. Refer to the Quick Guide to make sure you are using the correct screen mirroring function. If the screen stutters or lags, the distance between source and projector is too far. Make sure the phone is connected to the SSID of the projector.
Unable to play online media	 Check whether the network connection is normal. Check whether the wireless adapter is inserted into the Wireless kit port.
Abnormal casting/ black screen	 Make sure the ventilation works without blocked. Long press the Power button to shut down. Wait for the projector to cool down, and then press Power button to turn on again.
Unable to upgrade online	 Check if the Wireless adapter is inserted into the Wireless kit port. Check whether the network connection is normal. Select OTA upgrade in the Setting. Check whether there is a newer firmware version available to upgrade.
Cannot focus image	 Confirm whether the projecting distance is appropriate, and try to extend the distance between projector and screen. Check whether the lens is clean.
Remote control not functional	Replace the batteries of remote control.
Unable to shut down	Press the Power button for about 10 seconds to force the shut down.

Warranty

1. The defective product is valid for refund and replacement if claimed with proof of purchase and warranty card within 7 days of purchase, and the defect was not caused by inappropriate usage or mishandling of product.
